

# Unlocking Restaurant Performance: From Data to Strategy

An analysis of 9,500 market records to optimise pricing, service models, and customer engagement.

---

**ANALYST:** YASHAS M

**CONTEXT:** COGNIFYZ TECHNOLOGIES INTERNSHIP

**TECH STACK:** SQL (DATA VALIDATION) & POWER BI (VISUALISATION)

## THE MISSION

To analyse restaurant data to understand behaviour, pricing trends, and service availability gaps.

## THE DATASET

9,500 records across 21 columns including Location, Cuisines, Cost, and Ratings.

## KEY FINDING

Only **26% of restaurants offer online delivery**, yet this service is correlated with **higher customer ratings**, representing a major growth opportunity.

## THE OUTCOME

A fully interactive Power BI dashboard and a set of strategic recommendations for market expansion.

# Defining the Analytical Scope

## THE INPUT (RAW DATA)

9,500 Restaurant Records

21 Data Points per Record

Key Variables:  
Latitude/Longitude,  
Cuisines, Average Cost for  
Two, Price Range, Aggregate  
Rating, Votes

## THE QUESTIONS (BUSINESS GOALS)

**Behaviour:** How do customers engage with different price points?

**Service:** What is the impact of Online Delivery and Table Booking?

**Performance:** Which cuisines and chains dominate the market?

# Ensuring Integrity Through SQL Validation

**THE RESULT: 0% Missing Values.  
0% Duplicates. 100% Analysis-Ready.**

# The 360-Degree Market View

Market Size: 9.5K  
Total Restaurants

Performance Baseline:  
2.67 Average Rating

## Restaurant Data Analysis Dashboard

Service Gaps  
identified here

Interactive Slicers for deep-diving

# Market Composition: A Budget-First Ecosystem

Restaurant Count by Price Range

Top Cuisines

**Insight:** The market is saturated with budget-friendly North Indian options. Differentiation requires breaking this mould.

# The Delivery Gap: High Impact, Low Adoption

While nearly three-quarters of the market ignores online delivery, the data suggests it is a critical driver for customer satisfaction and reach.

# Engagement Metrics & Service Correlation

## SENTIMENT

Rating distribution is concentrated in 'Average' and 'Good' categories. Excellence is rare.

## THE PREMIUM LINK

Table Booking availability increases significantly as Price Range increases.

## MARKET LEADER

Cafe Coffee Day identified as the most common restaurant chain (83 ournt outlets), setting the benchmark for scale.

# Strategic Recommendations: Growth & Reach

## DIGITAL EXPANSION

**Action:** Increase adoption of online delivery services.

Rationale: Leverage the **correlation** between delivery and **higher ratings** to **expand customer reach**.

## PORTFOLIO DIVERSIFICATION

**Action:** Expand cuisine offerings beyond North Indian.

Rationale: **Reduce dependency** on the **most saturated** market segment to **capture untapped consumer preferences**.

# Strategic Recommendations: Operational Excellence

## **BUDGET SEGMENT**

Maintain affordability (Price Range 1 dominance) while incrementally improving service quality.

---

## **PREMIUM SEGMENT**

Double down on the 'Dine-In' experience by strengthening Table Booking services, a key differentiator for high-spend customers.

---

## **CHAINS**

Utilise customer feedback loops (Votes/Ratings) to ensure consistency across branches, emulating the scale of Cafe Coffee Day.

# Geographical Focus Areas

## Strategy:

**Prioritise these high-density zones** for targeted marketing campaigns to **maximise ROI**, rather than spreading resources thinly across lower-density areas.

# Bridging Technical Skill and Business Strategy

## THE TOOLS

SQL

Power BI

Mastery of Data Cleaning, SQL Validation, and Power BI Modelling.

## THE INSIGHT

TRENDING  
GRAPH

STRATEGY

Ability to identify trends (Delivery Gaps), understand behaviour (Price Sensitivity), and formulate strategy.

Closing Statement: This project demonstrates a comprehensive workflow—from raw data validation to actionable business intelligence—providing a strong foundation for future data analyst roles.
